GRATEFUL—COMFORTING.
EPPS'S COCOA!
BREAKFAST.

By a thorough knowledge of the natural laws which govern
the operations of digestion and nutrition, and by a careful
application of the fine properties of well-selected cocoa, Mr.
Epps has provided our breakfast tables with a deliciously
flavored beverage which may save us many heavy doctors' bills.
It is by the judicious use of such articles of diet that a
constitution may be gradually built up until strong enough to
resist every tendency to disease. Hundreds of subtle mal-
adies are floating around us ready to attack wherever there is a
weak point. We may escape many a fatal shaft by keeping
ourselves well fortified with this pure blood purifier and a properly
nourished frame. See Article in the *Civil Service Gazette*.

Made simply with boiling water or milk.
Sold only in Packets and Tins, 1lb and 1lb, labelled:—

THE PACIFIC
Commercial Advertiser.
SATURDAY, DECEMBER 29.
Telegraphic Projects.

To the Editor of the Pacific Commercial Advertiser:
Sir—Birds' Island—or, Ka Moku o na Manu—is
of no great importance to this Kingdom, and can
hardly be said to belong to the Hawaiian group
geographically. In the present negotiations on
the subject of the duplicate submarine cable be-
tween Australia and the west coast of North Amer-
ica, it may transpire that the British government
will deem it essential that the places in the Pacific
where breaks occur should be under the direct
protection of the British flag, a very desirable
condition for many reasons. It is not at all certain
whether the United States government will take
part in this undertaking. But, in case of refusal,
it appears probable that parties in Australia and
the Canadian Dominion will bring forward the
other scheme, already mooted, of starting with the
cable from British Columbia, and hastening on the
completion of the overland Inter-ocean telegraph
in British North America. Thus, the British gov-
ernment would establish direct telegraphic com-
munication between Great Britain, and Australia
and India, independently of all other powers. I
have a notion that ultimately a political impor-
tance will attach itself to this new cable scheme,
which will induce the British government to hurry
on the British North American Inter-ocean over-
land Telegraph, and to lay down immediately on
its completion, the submarine cable between Brit-
ish Columbia and Australia, regardless of cost, as
a measure imperatively necessary for the pro-
tection of both the Australian Colonies and British
India. Fifteen days' interruption in the British
Colonial office's communications with Australia
must have given a horrible shock to Earl Carnar-
von. Perhaps his Lordship at last began to fear
that the Russians, without waiting for England's
declaration of war, resolved to take the Bull by
the horns (no pun meant) and so seize the gold
mining Australian territories of England by a
grand coup de main—and accordingly planned
the interruption on the Java line. Joking apart,
this incident is likely to produce a lively impres-
sion on his Lordship's mind, and lead him to take
up energetically Lord Normanby's proposal.
Now, our geographical position fortunately places
us in the direct route of the proposed submarine
cable line. The British government, if it adopts
the scheme, may reasonably desire to place the
break stations under the British flag, as I remarked
above. The acquisition of Birds' Island would prob-
ably simulate Lord Carnarvon to go on with the
proposed undertaking, and I really think his ces-
sion or sale by the Hawaiian government would
have great weight in securing for this country the
inestimable benefit of telegraphic communication
with the outer world. A branch cable could be
brought down to Kauai, with an overland tele-
graphic line across that island, a second cable in
the Kauai channel, and another overland tele-
graphic line along this island to the capital of the
kingdom. If Birds' Island were ceded to Great
Britain, the branch line to Honolulu ought to be a
condition of the cession. Our government ought
to keep a good look-out just now, and follow the
course of events closely in this proposal of Lord
Normanby, as there seems to be a good chance of
this country getting an ocean cable on both sides
for just nothing at all—thanks to our excellent
situation in the North Pacific. I may add, in con-
clusion, that some years ago, when the Argentine
Confederation of South America, and Chile, com-
pleted their inter-ocean overland telegraph be-
tween Buenos Ayres and Valparaiso, and cable
communication was established between the River
Plate and Europe, it was proposed to lay down a
cable or series of cables between Valparaiso and
Brisbane, via Juan Fernandez, some of the eastern
South Sea Isles, Tahiti, the Fijis and New Caledo-
nia, and it was hoped that the French and British
Australian governments would co-operate with
those of Chile and the Argentine Confederation in
the undertaking. The scheme may be again re-
sumed, and is very feasible; but the North Amer-
ican Continent and Australia are likely to have
the first chance of communication through the
electric spark, so let us hope, as we are on the
route.

THE MISSIONARY IN TURKEY.—The *Missionary*
Herald for November contains some very significant
information concerning the condition of preachers of
the Gospel in Turkey in Europe and Asia. While
Russia is ambitiously pretending to overthrow the
lawful authority of the Padiashah in Bulgaria, for the
purpose of establishing a despotic Christianity in
that province, it may be useful to read what the
American missionaries themselves so wrote of their
situation in the midst of the Turkish empire. Ac-
cording to the *Missionary Herald*, at
Samsak the Turks appeared to be on the very best
terms with the missionaries. In case of danger they
fled, and Europe it was proposed to lay down a
cable or series of cables between Valparaiso and
Brisbane, via Juan Fernandez, some of the eastern
South Sea Isles, Tahiti, the Fijis and New Caledo-
nia, and it was hoped that the French and British
Australian governments would co-operate with
those of Chile and the Argentine Confederation in
the undertaking. The scheme may be again re-
sumed, and is very feasible; but the North Amer-
ican Continent and Australia are likely to have
the first chance of communication through the
electric spark, so let us hope, as we are on the
route.

ledged to be the
CHEAPEST WIND-MILL NOW IN USE
We are the ONLY Manufacturers in the World of
THE DOUBLE-HEADER WIND-MILL.
For more particulars, send for our Circular, and you will see
that, together with a large range of other goods, they offer a
[jy28 6m]

FOR BLEACHING.
Thoroughly wash and rinse the article with **SEMPER**
SOAP. Then again rub the soap well into the fabric and put
sufficient soft water to cover it, and let it soak twenty-four
hours or even longer if convenient, dry without wringing or
squeezing and iron while quite damp with as hot an iron as can
be used without burning—**SEMPER SOAP** may be
used for all purposes where it does not come in contact with
bright metal or paint. It does not stain, and removes all
other.

GLENN'S SULPHUR SOAP!
A SKIN LIKE MONUMENTAL ALABASTER may be
attained by using GLENN'S SULPHUR SOAP.
Try it, Ladies.
It is a genuine beautifier, and very economical. This Soap
safely and certainly removes cutaneous eruptions by opening
the pores whose obstruction was the cause of the difficulty;
TEST AND YOU WILL ENDORSE IT.
Being a powerful deodorizer, disinfectant and counter-
irritant, yet entirely harmless, it positively cures all local
diseases of the SKIN as if by magic.
It thoroughly bleaches the cuticle and PANGAMENTEUS RE-
MOVES THE COMPLEXION with a certainty unknown to any arti-
cle ever invented for that purpose.
It is emphatically the remedy for SCALDS and BURNS, im-
mediately removing all soreness without pain, and effecting a
cure in every instance.
As a preventative and remedy for GOITR and RHEUMATISM,
its effects are really wonderful.
It is a
